Dear DOJ:

A dilute remedy to the case (as initially proposed)
goes beyond erosion of our justice system.

Microsoft is imparting a continuous flow of damage
on Information Technology -- damage that has
already impacted individuals like you and me.

Their history shows clearly that
any "Go Forth and Sin No More" resolution
will be laughed at within the Company.

Moreover, any resolution that requires
a new Federal Agency to monitor their behavior
will place a new burden on the Taxpayer.
Is the Taxpayer the rightful bearer of this burden ?
